

AI-POWERED

PRODUCTIVITY & AUTOMATION FOR IT,
CONSULTING & BPM PROFESSIONALS

A futuristic white robot with glowing blue eyes and a man in a suit are shown in a digital workspace. The robot is pointing at a computer monitor displaying various data charts and graphs. The background is a blurred office environment with more screens and data visualizations.

Program Objectives / Outcomes

By the end of this 2-Day program, participants will:

- Use AI for faster client communication, documentation, and reporting.
- Automate repetitive consulting and IT workflows using AI agents.
- Apply RAG and prompt engineering to enterprise-grade knowledge tasks.
- Design presentations, proposals, and visuals 10x faster using multimodal AI.
- Build custom AI automations that improve team productivity and client turnaround time.
